写在前面

初中学习的最后一年，同学们粗略地看一下教材目录会发现，有一些似曾相识的内容。为什么？因为我们进入了一个为“知新”而“温故”的年段：一些知识的复现，一些法则的归纳，一些话题的延伸，一些“说法”的条理化，包括在教材上留出的空间，都是想让同学们集中精力，把多年英语学习的点点滴滴融汇在一起，沉淀、凝练，以形成坚实的基础。

在“读 (Reading)”的层面，虽然仍是读，但已不止于了解内容的前因后果，更要理解读物的人文内涵和生活提示。本年段我们会与许多伟大的人物和经典的文学作品相遇；也会接触当下的热点话题，如健康饮食和环境保护。对那些相隔时空或近在咫尺的阅读内容，要从“了解”趋于“理解”，并尝试品味和鉴赏，以获得对我们有益的人生经验。

在“听 (Listening)”和“说 (Speaking)”的层面，本年段更注重这两项能力在实际生活中的交际功能。语音语调的更加老练和会话的更加自如如训练的目标；还将继续教授一些功能意念的表达法，如接受或拒绝帮助，恰当地表示喜好、赞扬和同情等。要从“听懂”趋于“了然”；从“能说”趋于“说好”，力求在会话间体会到或表达出情绪和情感。

在“写 (Writing)”的层面，除继续七、八年级已接触的各种体裁和题材的写作训练，九年级的“写”更要与“听”“说”“读”齐头并进。写作是另一种方式的“说”，所谓笔述。当我们更好地掌握了语法，有了更多的词汇和更敏锐的语言感悟时，我们当然要在“笔述”中作一些比较、选择和呈现，要从“会写”趋于“会改”，让曾经“幼稚”的句子、短文逐渐变得成熟、生动起来。

在“课题 (Project)”制作层面，要求同学们展开的内容与生活十分贴近。像“设计一份图文并茂的菜谱”这样的命题，从选择菜式，体现国别、人文背景，配饰图案，到打算表露哪些文化蕴含，都要通盘考虑，即意味着同学们完成的“制作”要逐渐从“简”“浅”趋于“多元”和“精深”。

在“学习技能 (Study skills)”掌握层面，我们已经有了一定量的累积，今年还将学习一些文案实务，例如制定规划、起草提纲；并通过记识各种标识以快速了解、分析外界的一切。是时候把我们所学的英语技能糅合在一起，从“单一”趋于“综合”，让我们面对世界的眼睛有更宽阔的视野。

最后说一下教材中的另外“三个板块”：“语法 (Grammar)”的新授项目主要是各类状语从句和宾语从句，以及系动词和介词的用法，基本属于初中阶段语法的难点。但是，当我们啃下这些“骨头”以后，我们已然全面掌握了英语的初级语法，在阅读和写作上会有一个跨步。本年段的“补充阅读 (More practice)”和“文化角 (Culture corner)”十分丰富：中国的老子，西方的牛顿；主要英语国家间的英语也有差异？多么有趣的内容！一定会给大家有益的启迪。

同学们，努力吧，一定要让自己微笑着，自信地交出初中年段的最后一份答卷！

The voyages of Zheng He

Zheng He was a famous Chinese explorer. In 1405, he set off from China on the first of seven great voyages. This

5 was nearly a century before Christopher Columbus first set sail on his journey of discovery to America. His travels were so important that they are still studied today.

- 10 Zheng He was born in Yunnan in 1371. He rose to become a trusted official of the Yongle Emperor of the Ming Dynasty. The emperor ordered Zheng He to visit and explore the lands outside China. His task was to develop relations and set up trade routes with foreign countries. In a few years, he built a great fleet of ships, the biggest
- 15 in the world at that time. The ships were known as treasure ships. They were big enough to carry 25,000 people as well as very large quantities of goods.

From 1405 to 1433, Zheng He went on seven trips and visited South-East Asia, the Middle East and even the east coast of Africa.

- 20 It seemed that nowhere was too far for him to visit. These voyages allowed China to trade valuable goods like gold, silver and silk. At the end of each voyage, Zheng He returned with many things that were seen in China for the first time, such as a giraffe from Africa. Besides developing trade, the voyages also encouraged the exchange
- 25 of cultures and technologies. They helped the development of those countries and regions.

Zheng He died in 1433 during his last voyage. However, his voyages were such a huge achievement that people still remember him as a pioneer in opening up cultural contacts between different peoples

30 around the world.

*  **More practice**

A Read this article about Marco Polo. Then answer the questions below.

Marco Polo

By West Lake, in the city of Hangzhou, there is a small statue of a traveller. His name was Marco Polo.

Marco Polo grew up in the city of Venice, in present-day Italy. In 1271, when he was 17 years old, he set off on a journey to Asia with his father and uncle, and did not return home until 24 years later. His travels took him across Asia, along the Silk Road and throughout China. He loved Hangzhou so much that he described it as "the finest city in the world".

When Polo finally returned to Venice, there was a war and he was captured. While he was in prison, he told the stories of his travels to another man there. This man wrote

the stories down in a book called *The Travels of Marco Polo*. Because of the interesting descriptions of Asian life in the book, Polo's travels soon became well known in Europe.

The stories gave many Europeans their first look at the life and culture of the people in Asia. Polo told of many amazing things that were unknown to Europe, such as paper money. He also wrote about China's development, with its large cities and systems of communication. His book made Europeans more and more interested in the East. It also influenced many other explorers, including Christopher Columbus.

Polo died in 1324. His last words were: "I did not tell half of what I saw."

- 1 Who was Marco Polo and what was he famous for?
- 2 How were Polo's stories written down?
- 3 Why did Marco Polo's stories become so popular?
- 4 In what ways was China more developed than Europe at that time?

B Have you read *The Travels of Marco Polo*? What were the Chinese cities like at that time? Read the book and share it with your classmates.

Ferdinand Magellan

Ferdinand Magellan (1480–1521) was a Portuguese explorer. In 1519, he led the first voyage to sail around the world. It was also the first voyage to sail from the Atlantic Ocean to the Pacific Ocean. Magellan gave the Pacific Ocean its name, which means “peaceful sea” in Portuguese. However, Magellan himself was killed in a battle before the voyage was finished. Only one of his ships, the *Victoria*, completed the journey.

Would you like to travel around the world? How would you do it and where would you go?

Living in another country

My name is Brad Li. I'm here today to tell you about my experience as an exchange student in the United States last year.

I must admit that at first America was a big culture shock for me. Many things were strange to me: the language, the food and even the school.

- 5 I stayed with a host family in a small town. My host parents, Mr and Mrs Hurst, were very kind. They organized a lot of activities for me in my spare time so that I wouldn't miss home or feel lonely.

- However, to a certain degree, life in the US was hard to get used to. My main problem was with the language. I failed to understand much in the
- 10 first few weeks because everyone spoke so fast. Though I soon managed to get used to it, I still had problems because they used a lot of idioms. For example, they often say they are "under the weather" when they are ill. Their everyday English is very different from what we learn in China.

- Another difference was the food. My host family always had bread,
- 15 potatoes and salad for meals. I really missed the dumplings, rice and delicious dishes from home.

School was a big shock too. They do not require students to wear uniforms, so students can wear almost whatever they like. Some students have strange hairstyles as well. Some students even have pink or purple hair!

- 20 Anyway, I have many great memories of that year, especially playing in the snow in winter, and playing baseball. At Halloween, I went to a party dressed as Harry Potter. At Thanksgiving, we had a big dinner with a huge turkey.

- It was an exciting year, and it was a valuable education for me. Now I
- 25 understand more about American culture. My American friends asked me many questions about life in China, and this made me think about my own culture as well.

We're different in some ways, and we're similar in others.

Yes. We both have two hands, but I only have one leg! I'm also smarter than you.

A1 Sam, an exchange student, is discussing festivals in the US and China with his Chinese teacher, Mr Li. Read their conversation and practise it in pairs. Pay attention to the words in blue.

Mr Li: Sam, did you enjoy your first Spring Festival in China?

Sam: Yes, I did. During this festival, many family members get together.

Mr Li: Yes. I hear that at Thanksgiving Americans also get together for a special meal. It sounds similar.

Sam: Yes. It's similar. During these holidays, both the Chinese and Americans come home and have a big dinner. It's great fun.

Mr Li: What do you think are the main differences between the Spring Festival and Thanksgiving?

Sam: Well, we take part in different activities and eat different kinds of food. In China, people usually set off fireworks and eat dumplings. In the US, we usually watch a Thanksgiving parade and an American football game on TV. We also eat turkey.

Read the article about education in the UK and discuss the differences between education in the UK and China. Then complete the table below.

Education in the UK

Every child in the UK must receive a full-time education until the age of 16. Parents can choose to send their children either to a state school, which is free, or to a private school, where a fee is required.

The school year is generally divided into three terms. Each term ends in a holiday. The summer holiday is the longest and usually lasts from the middle of July to the beginning of September.

Education has two main stages—primary school and secondary school. Primary schools are for students from the age of 5 to 11. The main subjects are Maths, English, History, Geography, Science, Art, Music and PE. Secondary schools are for students from the age of 11 to 16 or 18. The same subjects are taught there, as well as other subjects such as foreign languages (usually French, German or Spanish), Technology and Computer Studies.

After the age of 16, students can either find a job or continue their studies at a school or college until they are 18. Between the ages of 16 and 18, students must choose only three or four subjects to study. At the end of the two years, they must take some important exams. If they do well, they can then go on to study at university. There are over 100 universities in the UK, and the most famous are the University of Oxford and the University of Cambridge.

English around the world

Just like many other languages, there are different varieties of English, and not everyone speaks English in the same way.

The two most important varieties of English are British English and American English. They have many small differences in grammar and vocabulary. For example, the British say “trousers” while Americans usually say “pants”. However, the biggest difference is in pronunciation.

What other varieties of English do you know about? Do you know how they are different?

A2 What is the result of the greenhouse effect? In groups, discuss this with your classmates.

B Before you read

Look at the pictures, the title, the introduction and the sub-headings of the article on page 35. Then answer the questions below.

- 1 What is the article mainly about?
- 2 What problems does the article discuss?
- *3 A consumer is someone who buys and uses things. Can you guess what a “green consumer” is?

The world is in danger

Our world is in danger. We must do something to protect the environment. But, what are the main problems we face?

The greenhouse effect

The atmosphere around the Earth is necessary for all living things. It is like the glass of a greenhouse, letting sunlight in and keeping heat from getting out. Without it, the Earth would be the same as the Moon—cold and lifeless.

When we burn fuels such as petrol and coal, we produce a gas called carbon dioxide (CO₂). Too much of this gas pollutes the atmosphere, and causes it to keep in too much heat. As a result of the greenhouse effect, the Earth's temperature is increasing. This causes sea level to rise, and in the future may cause cities to disappear.

Cutting down forests

Every year, we destroy nature by cutting down huge areas of forests. This makes the greenhouse effect worse because trees take in CO₂ and produce oxygen. Cutting down trees also destroys the homes of the animals that live in our forests, and causes the surface of the soil to be

easily destroyed by rain. This can result in floods and even more damage to the environment.

Bad habits

Many of our habits cause pollution. People often use things once and then throw them away, or leave them on the ground as litter. This creates mountains of rubbish and pollutes our land and seas.

In order to protect the environment, we need to take proper action. We should be different from many consumers and become "green consumers". This means that we should only buy and use products friendly to the environment. We should also recycle as many things as we can. We can reuse things for the same purpose as before, or we can use them for new purposes. If we just learn to live in new and different ways, we can make a difference.

C Vocabulary

A Read the story about the journey of a plastic bottle. Then answer the questions below.

The journey of a plastic bottle

I am a plastic bottle. A week ago, I was on a supermarket shelf. I had a normal life, the same as all my brothers and sisters—other bottles full of water. I felt really happy.

Then a tall woman picked me up and put me in her basket! The woman took me home and put me in the fridge. It was cold, but I soon made friends with the cans and bottles in it. However, only a few hours later, she took me out of the fridge and drank the water inside me. Then she threw me into a dustbin. I have never felt so empty and alone in my life.

Early the next morning, a man took me out of the dustbin. He threw me and the other rubbish into the back of a truck. There were so many horrible smells. Then I was pushed together with the rest of the

rubbish. Soon I was completely flat. I cannot believe how thin I became.

I slept for a while. When I woke up, I found myself in a terrible place. Everything around me was ugly and had horrible smells. I felt afraid. I kept hoping that I would be moved somewhere else. Then huge trucks came and covered us with a layer of soil.

I asked another bottle what would happen to us. He said that we would never leave this horrible crowded place, but would have to stay here for thousands of years.

“Why can’t they reuse or recycle us?” I cried.

- 1 At the beginning of the story, what was inside the plastic bottle?
- 2 What happened to the plastic bottle on the next day after the woman threw it away?
- 3 What will happen to this plastic bottle?

B Can you describe the journey of this plastic bottle? Can you change his journey in a green way? Discuss this with your classmates.

The average score for our group is 8.3. This means that we are medium green. Ten per cent of us have not started turning green yet. Twenty per cent are pale green. Forty per cent are medium green. Thirty per cent are bright green.

We scored the most points for questions 2 and 5.

We scored the fewest points for question 4.

Your carbon footprint

The total amount of carbon dioxide (CO₂) you produce a year is called your carbon footprint. Besides breathing, there are two other ways you can produce CO₂. First, you can do it directly, by driving a car or using a gas stove. Second, you can do it indirectly, by buying or using products that produced CO₂ when they were made.

Generally, you should make your carbon footprint as small as possible. For example, you can use public transport instead of a car, or you can walk or cycle.

What other things can you do to reduce your carbon footprint?

A2 In pairs, discuss the following questions.

- 1 What other natural disasters can you think of?
- 2 What should people do when there is a natural disaster?

B Before you read

 Look at the pictures, the title and the first paragraph of the story on page 51. Then circle the best answers.

- 1 What is the first word that you can think of to describe the story?
 - a Dream.
 - b Water.
 - c City.
- 2 Why did Kevin have this dream?
 - a Because he is interested in the North and South Poles.
 - b Because he is worried about the environment.
 - c Because he likes Geography.

The great flood

Last week in Geography class, we learnt that if all the ice in the North and South Poles melted, sea level around the world would rise, and

5 many cities would be flooded and disappear.

It started to worry me. What would happen if our city was badly flooded? Would anyone remain

10 alive?

Last night, I dreamt about a great flood:

It was nine o'clock in the morning. My bedroom floor was a pool of water. I

15 looked out of the window. Water was everywhere. It covered roads, parks and small houses. Large objects, such as coaches and boats, passed by my window. They were floating in the water.

20 I could not just stand there! I had to do something!

I tried to call my dad, but the line was dead. My computer was still working, so I sent him an email. I wrote, "Dad,

25 there's a flood! What should we do?"

He sent me an email back which said, "Kevin, my boss has given me some work. It's important to stick with it. I

can't afford to sit around and worry

30 about the flood."

Then I emailed my best friend. "What should we do about the flood?" I asked. My friend replied, "I have no time to think about the flood. I'm

35 playing computer games ..."

I shouted, "The WATER! Look at the WATER!" But my cries fell on deaf ears. In offices and homes, people just sat and stared at their computer

40 screens. It seemed that they did not want to leave. Computers were more important than the flood.

Very soon, the water came into people's rooms. It poured onto their

45 desks and covered their computers. In surprise, people finally started to notice the flood, but it was too late.

Then I awoke. There was no water. I was safe—for now.

Peter: (*brave*) Let's hide under our desks.

John: (*worried*) It's not a good idea to hide there. The desks aren't strong enough.

Judy: (*very afraid and crying*) The building is going to fall down. We can't do anything.

Peter: (*brave*) We'd better leave this building at once. Follow me. Let's move to an open area.

Amy: (*worried*) It's impossible for us to go anywhere. We should stay here and wait for the earthquake to stop.

*  **More practice**

A Read the article about a natural disaster in Canada. Then answer the questions below.

The ice storm

It was a dark day in Canada in 1998 when rain began to fall from the sky. However, this was not ordinary rain—it turned to ice as it fell through the cold air. It rained for six days, and as much as ten centimetres of ice collected on roads, trees and power lines.

On 5th January, the people of Montreal woke up to find they had no electricity in their homes. It was dark and cold. The roads were covered in ice, so it was very dangerous to walk or drive anywhere. Families had to stay inside and burn wood to keep warm. They expected the power to come back on at any time.

However, the ice kept falling. It caused branches and whole trees to fall down. More power lines fell down, and the roads became even more dangerous.

By the third day, many families had no food to eat. It was a difficult time. The army sent over 14,000 soldiers to help.

Finally, after six days, the ice storm stopped, but the trouble was not over. The huge amount of ice made the whole area very dangerous. As the ice started to melt, it fell from the roofs of buildings and trees like knives. Most of the power lines were so badly damaged that they could not be repaired.

Some families had no electricity for a whole month. Many homes were damaged and many people, especially farmers, lost their businesses. The people of Canada will never forget how terrible nature can be. Everyone hopes that there will never be another ice storm like the one in 1998.

- 1 Why was the storm in 1998 unusual in Canada?
- 2 What problems did the ice storm cause?
- 3 Did the trouble end when the ice storm stopped? Why or why not?

B Have you ever experienced or heard about a natural disaster? In groups, discuss the following questions.

- 1 What was the natural disaster like?
- 2 What did people experience during the disaster?

How a typhoon gets its name

In the old days, every country had a different system for naming typhoons. Therefore, a typhoon that hit several different countries might have different names.

In 2000, 14 countries and regions in the Pacific Region began to use a new system for naming typhoons. Each of the countries and regions offered ten names. These could be names of men, women, flowers, animals, trees or even food items. Whenever a new typhoon arises, it is given the next name on the list. When the end of the list is reached, the same names are used over again.

Do you know the names of any famous typhoons? What else do you know about them?

An earthquake

- What supplies should be stored in case of an earthquake?
- If you cannot leave the building safely, what should you do when an earthquake starts?
- What should you never do during an earthquake?
- What should you do if you are trapped?
- What should you do immediately after an earthquake?

- C** Based on your research, think of at least five tips and write them on a piece of paper. Find some photos to go with your work. Follow the example.

Earthquake survival tips

- Tip 1:** Store supplies such as food, water and medicine.
- Tip 2:** Stay calm and take cover if indoors.
- Tip 3:** NEVER use the lift.
- Tip 4:** Stay away from anything that might fall on you.
- Tip 5:** Leave the building quickly and stay out in an open area after the earthquake stops.

Skiing: An unforgettable experience

by Vanessa

Last year, my parents took me on a very special holiday.

My dream was to see some real snow, so during the Christmas holiday, we took
 5 our passports and flew over the Pacific to Calgary, Canada. We took a bus to a ski resort in the Canadian Rockies.

As the bus climbed through the mountains, we saw the thick snow on the trees. I was dying to get out and play with it! At last, we
 10 reached the resort and quickly jumped out of the bus. This was our first experience with snow. We were like little children—we made snowballs, and threw them at one another! Then we checked in at the hotel. We could see the ski slope opposite the hotel. We could not wait to get out and ski.

15 The next day, we put on our ski suits and gloves, took our skis and went outside onto the snow. Wearing skis for the first time made me feel strange. Suddenly I found myself unable to walk! Then we had a skiing lesson with a young couple. Our instructor took us to a gentle slope, and showed us some basic skills. To be honest, that first lesson
 20 was not a great success. I kept on falling over, and I had to hold on to a rope to keep my balance.

However, the next day, I only fell over a few times, and I managed to do a few rapid runs. I felt pleased with myself, and my instructor told me I was doing much better.

25 Although it was very cold, I spent most of my holiday skiing. I had a wonderful time.

It was all over too soon. It was a shame, but we had to leave. I wish my
 30 parents would take me back for another wonderful skiing holiday this year.

A Read this article about the Olympic Games. Then answer the questions below.

Faster, Higher, Stronger

The Olympic Games have a long history. They began in Greece and lasted for over a thousand years, until 394 AD. The ancient Olympic Games were very different from the Olympics we have today. In ancient times, only the Greeks took part in the Olympics, and women were not allowed to join or even watch them.

The first modern Olympics were held in Athens, Greece in 1896. Every four years, athletes from all over the world take part in different sports at the Olympics. Many of these athletes are women.

A large group of athletes at the Olympics takes part in track and field events. Track events, such

as running, test a person's speed. Field events, such as the high jump, long jump and shot put, test how high or far someone can jump or throw an object.

One of the most exciting events in the Olympics is the 100-metre race. More than one hundred years ago, the world record for the men's 100-metre race was 10.6 seconds. However, athletes have run faster and faster over the years. In 1960, the record was 10 seconds. Then at the 2008 Beijing Olympics, the record was set at 9.69 seconds.

The Olympic motto "Faster, Higher, Stronger" is what the Olympics are all about.

- 1 What are the differences between the ancient and modern Olympics?
- 2 What is the difference between track events and field events?
- 3 What does the writer think the Olympics are all about?

B In groups, discuss the following questions with your classmates.

- 1 What is your favourite Olympic sport? Why?
- 2 Which is more important: winning lots of medals, or trying your best?

Charts and graphs (5): Understanding signs

There are signs everywhere. We may not be able to understand the language in a foreign country, but we will probably understand the signs there.

Different signs tell us different things. They give us:

- directions (where to go and how to get to a place)  turn right for the airport
- warnings (what we should not do)  no ball games
- information (what we need to know)  first aid here

How to lead a balanced life

Many students suffer from stress in their daily lives. They are under stress because their lives are not balanced. They focus too much on studying, dealing with peer pressure and worrying about what others think, and not enough on other things. You may wonder whether stress is a serious matter. The answer is “Yes”. You should be aware that stress is a risk to your health. If you want to live a long and healthy life, you need to begin to guard against stress from a young age.

Here are some ways to deal with stress and bring balance to your life:

- **Be positive**
10 One way to cancel out stress is through positive thinking. You should always look on the bright side of life, and imagine that you will have a happy and successful future.
- **Learn to relax**
15 Force yourself to take a break from your studies and worries about exams. You can do this by taking a walk, reading a book, going to a concert or seeing a film, or just sitting in a private place and being silent for a moment.
- **Take up a hobby**
20 Learn to paint, take up skating, or start playing a musical instrument. When you are busy with a hobby, you leave all your worries behind.
- **Take care of your body**
25 Stress is your body’s enemy. Taking regular exercise, eating a healthy diet and getting enough sleep are all the things that can help you.
- **Laugh**
30 Sometimes laughter is the best medicine for stress. Seeing a funny film or telling jokes with friends will often cheer you up when you are low.

You should be **aware** (that) **stress** is a risk to your health.

Here are some **adjectives** we can use in this way:

afraid	glad	pleased	sorry	surprised	upset
certain	happy	sad	sure	unaware	worried

Things to remember

We can use a *wh*-clause after *not sure* and *not certain*.

I am **not sure** how I can deal with this problem.

He is **not certain** who will come.

You went to see a doctor last week. Write about the visit using the adjectives from the box and the sentences below. Use a different adjective each time.

Sometimes there is an **indirect object** or a **phrase** with *to* before the **object clause**.

Can you tell **me** how I can deal with stress?

The student reported **to the teacher** that he did not feel well.

Things to remember

Can you tell me **how I can deal with stress?**

*  **More practice**

A Read the article about puberty from a health magazine. Then answer the questions below.

Growing up

Puberty is the stage of life when young people leave childhood and head into adulthood. It is a difficult process for teenagers because it has an effect on both their minds and bodies. They need to understand what is going on with their bodies, how to deal with those changes and how to start taking responsibility for themselves.

A young person may begin puberty at 8, while another may not start puberty until 14 or 15. In general, girls start puberty two years before boys do. For both girls and boys, it is usually complete by the age of 18.

During these years, the body develops in many ways. Feelings can also change quickly.

Teenage boys at this stage often begin to take unnecessary risks. Their focus is on having fun and being accepted by others. They need to think before they act and make good decisions for themselves.

A girl's personality often does not develop in the same way as a boy's. Teenage girls sometimes lose confidence in themselves. They are no longer certain about their own feelings. Yet they are usually afraid to tell their parents or teachers about their problems. For this reason, teenage girls should be encouraged to discuss things with trusted adults.

Parents, schools and communities can do a lot to care for and help young people. It is everyone's responsibility to make sure that young people grow into healthy adults.

- 1 What are some differences between puberty in boys and in girls?
- 2 Why should teenage boys learn to make good decisions?
- 3 Why should teenage girls be encouraged to discuss things with trusted adults?

B What do you think your parents and teachers can do to help you during puberty? Discuss this with your classmates.

The “new” medicine that is old—TCM

Today when people in the West need medical help, they often choose a “new” kind of medicine that is actually quite old. They choose traditional Chinese medicine (TCM).

TCM uses many different kinds of treatments. Herbal medicines are used, for example, to help bring balance to the body.

Many of the treatments used in TCM have helped people for thousands of years.

Have you or your family ever used TCM? What was it like?
